

Clinical Cases with the BioBoost Effect®

On-Demand Virtual Program

PROGRAM DESCRIPTION:

When a clinician is challenged to place an implant in difficult cases, there is a need for an appropriate implant. When using Trabecular Metal® Dental Implant, the clinician can use the BioBoost Effect to enhance the healing, shorten the treatment time and reduce the risk of a failure in comparison of a traditional dental implant. This BioBoost Effect is illustrated with clinical cases.

- The BioBoost Effect is a multiplication of naturally-occurring growth factors to deliver faster healing and earlier bone formation than traditional implants.
- The BioBoost Effect, only available on the Trabecular Metal Dental Implant, is the result of a proprietary combination of cancellous-like porosity and biocompatible tantalum.
- With mounting evidence of this clinical advantage in Rapid Recovery, Risk Management, and Revision Therapy cases, harness the healing power of the Trabecular Metal Implant.

Program Objectives:

At the end of this course, participants should be able to:

- Understand the BioBoost Effect in implant dentistry
- Comprehend the procedure (extraction, ridge preservation with Puros and PRF (Platelet Rich Fibrin), Trabecular Metal Dental Implant placement, direct digital impression and deliverance of the implant crown in two weeks)
- Understand the attributes of a Trabecular Metal Dental Implant which may be beneficial in these challenging clinical situations.
- Choose the appropriate type of implant and understand the benefits

Drs. Jos Deurloo*

Jos Deurloo is a general practitioner and dental implant specialist. He graduated cum laude at ACTA in 2000 and started placing implants in 2003. He owns a private dental clinic De kiezel in Noord Scharwoude and has experience in the field of implantology in the Netherlands and abroad since 2005. Since 2007 he trained over 100 dentists in placing their first dental implants in their own dental offices. He lectures on dental implants, GBR and minor oral surgery.

*This clinician has, or in the last 2 years had a financial relationship with ZimVie Dental resulting from speaking engagements, consulting engagements and other retained services.
