

Program lecture Immediate Dentoalveolar Restoration - 3 November 2018

Program		
Time	Subject	By
08:45	Receipt	
09:15	Introduction	Drs. Peter van der Schoor
09:30	Start Lecture	Dr. José Carlos Martins da Rosa
10:45 - 11:15	Break	
12:30 - 13:00	Lunch	
14:30 - 15:00	Break	
16:30	End Lecture	
16:30	Wrap up & End	
<p>COURSE PROGRAM:</p> <ul style="list-style-type: none"> <li>• Immediate loading on intact sockets</li> <li>• Considerations about the relationship between the thickness of buccal bone wall and ideal positioning of the implant</li> <li>• Gaps in sockets: a new approach for selecting of implant diameter in post-extraction sockets</li> <li>• Methods of measuring the degree of tissue loss in the regions involved</li> <li>• Classification of socket bone defects</li> <li>• Use of the maxillary tuberosity as a donor site – tissue biology and surgical technique</li> <li>• Immediate Dentoalveolar Restoration protocol</li> <li>• Emergence profile design on implant-supported prosthesis</li> <li>• Immediate loading in alveolar bone defects with and without gingival recessions</li> <li>• Indications for the use of cortico-cancellous and triple graft</li> <li>• IDR and Osseodensification</li> <li>• Case series report</li> <li>• Complications and how to avoid them</li> <li>• New researches and clinical studies on IDR</li> </ul>
