

Absorbable collagen
membranes

BioMend[®] and BioMend Extend[™]

1. Absorbable¹

Eliminates second-stage surgery for membrane removal, designed to reduce wound trauma and surgical chair time

2. Cell-Occulsive

Serves as barrier to prevent epithelial cell migration and allow passage of essential nutrients¹

3. Space Maintaining

A rigid enough scaffold for tissue regeneration in GTR and GBR procedures

BioMend Membrane being prepared for placement in the sinus cavity

 **ZimVie**

BioMend and BioMend Extend

The absorbable membrane rigid enough to create and maintain space

Versatile Barrier Function

- Indicated for use in guided tissue and guided bone regeneration procedure
- BioMend Membrane is designed to be absorbed in approximately 8 weeks¹
- BioMend Extend Membrane is designed to be absorbed in approximately 18 weeks¹

Convenient Handling

- Tear resistant, suturable, pliable
- Easy to handle even when hydrated
- Rigid enough to create and maintain space

1. Exposed buccal wall defect on #3.

2. Membrane being prepared for placement.

3. Membrane cut for placement.

4. Membrane placed in socket.

5. Sutures placed to close site.

6. Final aesthetic result.
