

OverdenSURE[®] Removable Attachment

System

ZimVie

ZimVie DENTAL SOLUTIONS

Good just got better with ZimVie's new removable attachment system, OverdenSURE!

Edentulism and failing dentition continue to be major health challenges affecting millions of people worldwide.

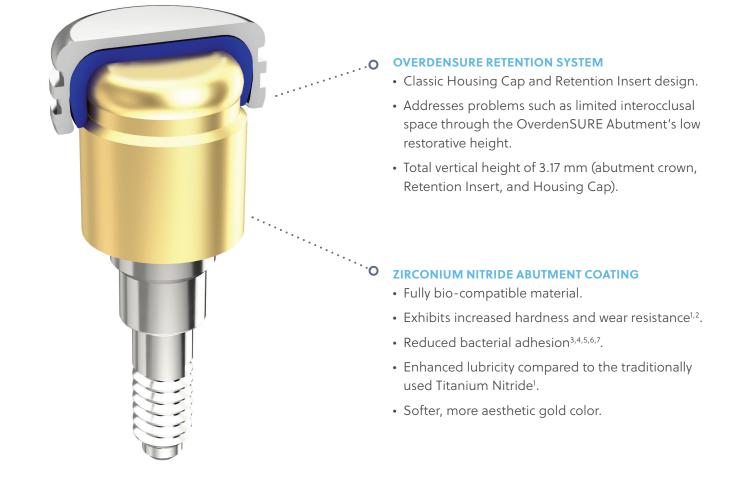

Our OverdenSURE product line features a Zirconium Nitride abutment coating for excellent aesthetics and function, and a wider range of abutment sizes for increased restorative flexibility, all wrapped in a classic system design that is intuitive to the user.

Zirconium Nitride is a fully bio-compatible material that exhibits increased hardness and wear resistance^{1,2}, reduced bacterial adhesion^{3,4,5,6,7}, and enhanced lubricity compared to the traditionally used Titanium Nitride.¹

It is estimated that 10% of the world's population is partially edentulous or edentulous⁸. In spite of advances in denture prosthodontics, soft-tissue supported dentures continue to be a source of:

- Chronic residual ridge resorption
- Decreased masticatory function
- Phonetic challenges
- Facial collapse
- A loose or poor fit

Together with our dental implant solutions, OverdenSURE Abutments are an ideal option for overdenture restorations, providing increased prosthetic stability and retention for patients wearing conventional dentures.

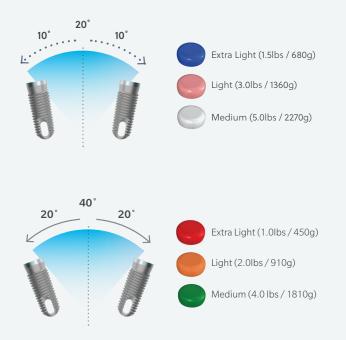

OverdenSURE Retention and **Pivoting Technology**

The OverdenSURE Retention Inserts have been designed to swivel inside the fixed Housing Cap enabling the easy seating of the removable prosthesis even when:

- Implants are placed off axis.
- The denture is not fully aligned with the abutments.

OverdenSURE Standard Retention Inserts

The Standard Retention Inserts provide angle correction for implants with up to 10° of implant divergence off axis, and a total of 20° of divergence between two implants.

OverdenSURE Extended Retention Inserts

The Extended Retention Inserts accommodate for up to 20° of implant divergence off axis, and a total of 40° of divergence between two implants.

All OverdenSURE Abutments come pre-mounted with a placement tool for ease of use!
